DETAILED ACTION

1. Claims 1-18 are presented for examination.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-18 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed invention is directed to an agreement and funding services between parties in the field of human tissue recovery agencies. The claimed invention does not contain any recitation that technology is used to carry out the invention. Furthermore, the claimed invention is directed to an abstract idea (i.e. funding and a contract between parties). Upon a further review of Applicant's specification, the Examiner notes that the specification is devoid of any language indicating the use of a computer or data processing means. Therefore, the invention is directed to non statutory subject matter.

The Examiner notes that if Applicant attempts to include language in the claimed invention directed to processing means, a new matter rejection will be forthcoming since the specification is devoid of the use of any technology including processing or computer means. The specification cannot be amended in the instant application to include processing means since the specification and the entire application is devoid of any technology including computer or data processing means.
